

US00561421A

United States Patent [19]

Ahl et al.

[11] Patent Number: 5,614,214

[45] Date of Patent: Mar. 25, 1997

[54] REDUCTION OF LIPOSOME-INDUCED ADVERSE PHYSIOLOGICAL REACTIONS

[75] Inventors: Patrick L. Ahl, Princeton; Suresh K. Bhatia, Plainsboro; Sharma R. Minchey, Monmouth Junction, all of N.J.; Andrew S. Janoff, Yardley, Pa.

[73] Assignee: The Liposome Company, Inc., Princeton, N.J.

[21] Appl. No.: 247,053

[22] Filed: May 20, 1994

Related U.S. Application Data

[63] Continuation-in-part of Ser. No. 207,651, Mar. 7, 1994, abandoned, which is a continuation-in-part of Ser. No. 65,928, May 21, 1993, abandoned.

[57] ABSTRACT

Provided herein is a method of administering a liposome composition to an animal, the method involving administering to the animal a liposome composition containing an adverse physiological reaction-reducing effective amount of a liposome which has, in addition to a bioactive agent, a lipid bilayer containing a lipid and a surface agent-modified molecule. An adverse physiological reaction which may be experienced by the animal upon administration of a liposome composition is reduced by way of the presence of the surface agent-modified molecule in the liposome's lipid bilayer.
